Impressions

Even the most beautiful days eventually have their sunsets. It’s how we choose to recall those days that make memories last.
CHOOSING A FINAL RESTING PLACE

Cremation allows families to choose from a range of alternatives to remember the life of a loved one forever.

There are three steps in Selecting a Cremation Urn:

1. Choosing a Final Resting Place
2. Creating a Memorial
3. Personalization

Choosing a Final Resting Place is the first step in selecting a cremation urn. This choice will allow a family to appropriately pay tribute to their loved one and create a lasting impression in a meaningful place.

Four highly respectful choices are available:

NICHE
(a mausoleum or place of worship)

BURIAL
(a cemetery)

SCATTERING
(a meaningful natural location)

HOME
(kept close to the heart)

This symbol indicates urns which are available for engraving. Please note that Impressions Imaging is available on any urn with a flat surface.
Impressions Imaging™ is a full color heat transfer graphic image process. It allows for complete creative freedom and unlimited possibilities. Have the freedom to honor your loved one as they should be remembered.

This process can be applied to any urn with a flat surface. Choose from one of our six templates or design your own with the help of our graphic design team.

Add that personal touch with portrait photography, graphic images or a sentimental phrase.

Ambrosia is a brushed stainless steel urn with a base. The rose and base are made out of bronze which is finely detailed creating a unique look.

Engraving is available on top above the rose and on the front of urn.

Cold Cast Journals

Crafted out of cold cast composite with intricate patterning on the front and back, the Cold Cast Journals are painted brass and bronze giving them an antique look.

Engraving is available on the front and back of the urn in the space provided representing a life full of stories and memories.
Bronze is a popular choice because of its strength, durability, and ability to capture intricate details and fine distinctions on the urn.

The Bronze chest is solid bronze with a brushed lacquered finish.

The Bronze Chest provides the ability to add a picture or customization of Impressions Imaging, which adds color or special memories of a loved one.

Engraving is available on the top and front of the Bronze Chest.

The Vesta is a solid brushed bronze urn with a lacquered finish. Because of the durability and strength of bronze, fine detailed images may be engraved, like the wheat image shown above.

The Vesta can only be engraved on front.
The Tribute is similar to the Fairmont in size, design, and wood type. This urn is crafted out of a solid cherry wood and can be engraved on the top and front. Also Impressions Imaging may be applied with a variety of images or family photos.

The Tribute frame is an LCD picture frame with photo, video, and audio capabilities. It can be used even when it’s not attached to the urn, and stand on its own.
The Embassy Oak (right) is handcrafted and includes a satin finish. Like shown on the Embassy Oak Impressions Imaging is able to be applied with a standard or custom image.

Engraving is available on top and front of Embassy Oak, and Fairmont. Once engraving is finished, a fill is applied to create a smooth and lasting surface.

The Fairmont (left) is made out of a red cherry wood with a satin finishing coat.

Impressions Imaging is also available on the top and front with a custom or standard image.
Cloisonné Urns are carefully crafted using a copper wire to define the shapes, and designs. They are then filled in with enamel giving the Cloisonné its colors and distinctive copper lining.

The enamel fill is made out of different mineral compositions which creates the dazzling colors on the Cloisonné. Finally it is polished repeatedly to enhance the shine.

The Cloisonné collection cannot be engraved directly on the urn because of the delicate enamel fill. Instead, pendants as shown on the Elysse Blue Cloisonné are available for the full-size urns to be engraved with name, and dates.

The Elysse Blue Cloisonné Heart Keepsake stand is sold separately.
The Parisian Gold Lily is a hand-blown glass urn. Each urn is handcrafted giving a distinctive and unique look. They are then painted on the inside to increase the attractiveness of the cut glass.

The Parisian Gold is available in a keepsake as well as full size

Engraving is not available for the Parisian Gold Lily.
Stone often plays a significant role in some of life’s defining moments. Like jumping off a favorite rock into a cold lake, gazing in awe at the stunning beauty of a rugged canyon, or preparing a favorite meal on a marble countertop. Stone connects us to each other. Its permanence and weight are fitting for remembering a cherished loved one.

Because the Tiger Eye and Bengal are made from stone and individually molded, each marble urn is different from the next in its unique design and appearance.

The Tiger Eye marble has a smooth polished surface with handcrafted ridges along the bottom.

The Bengal marble has a smooth polished surface with a multi-colored design and handcrafted ridges along the top and bottom.
The Brown Berkeley is solid brass with a brown finish. The brass sections have a brushed finish.

Engraving is available with name, date or personal message.

Brass is made from joining together copper and zinc. The proportions are determined by the luster (a gentle sheen or soft glow) required.

Brass has a gold-like appearance to everything it is placed on, durability making it timeless, and luster making it memorable.

The Clarion Pewter is a brushed brass urn with a lacquer pewter finish.

Engraving is available on the front with a name, dates, or personal message.
Bamboo is one of the fastest growing plants in the world. Though it is biologically considered to be a grass, bamboo is prized for having a strength and resilience that rivals many types of wood.

The Basic Bamboo urn is eco-friendly and has the appearance of a polished wood urn. The flat sides of the urn are suitable for both engraving as well as Impressions Imaging.

The Patmore Memory chest is made out of MDF with a lacquered finish. The top of this urn has a lighter panel, creating contrast through the chest. The Chest opens and closes on two hinges, and includes a temporary cremation bag.

The flat sides of the urn are suitable for both engraving as well as Impressions Imaging.
